DATA SCIENTIST INTERN

AI Engineer and MCA student skilled in Python, SQL, Generative AI, RAG, and AI agents. Experienced in building AI-powered applications, integrating LLMs and APIs, and developing practical, deployable solutions using modern AI technologies.

WORK EXPERIENCE

Data Scientist Intern – Rubixe AI Solutions **May 2025 – Nov 2025**

- Developed machine learning pipelines in **Python and Scikit-learn** for prediction and classification across data science workflows.
- Performed manual **Exploratory Data Analysis (EDA)** to identify patterns, anomalies, relationships, and actionable insights across datasets.
- Built data preprocessing and feature engineering workflows using **Pandas, NumPy, and SQL**.
- Applied **data cleaning, transformation, visualization, and statistical analysis** techniques to prepare and analyze datasets.
- Developed **Vizion**, a reusable Python EDA and visualization library, to automate repetitive data-analysis and visualization tasks.
- Automated data-processing and reporting workflows, gaining hands-on experience with **machine learning and data science pipelines**.

EDUCATION

DPGU School of Management & Research, Pune **2025 – 2027**
Master of Computer Applications (MCA) — 84%

MJ College, Jalgaon **2023 – 2025**
Bachelor of Computer Applications (BCA) — 75%

TECHNICAL SKILLS

Programming: Python, SQL
Data Science: Pandas, NumPy, Exploratory Data Analysis (EDA), Statistics, Data Cleaning, Feature Engineering, Data Visualization
Machine Learning: Scikit-learn, Regression, Classification, Clustering, Random Forest, XGBoost, SMOTE, Cross-validation, Model Evaluation
Generative AI: OpenAI API, RAG, Prompt Engineering, Embeddings, Vector Search, Information Retrieval, AI Agents
Backend & Data: FastAPI, FAISS, Data Validation
Databases: MySQL, SQLite
Tools & Deployment: Git, GitHub, Jupyter Notebook, VS Code, n8n, Ollama, Linux, VPS Deployment

PROJECTS

Data4Viz – AI-Powered Data Analysis Platform
Deployed App
Python • FastAPI • Pandas • NumPy • Scikit-learn • OpenAI API • Groq

- Built a Python-based data analysis platform to automate **data exploration, preprocessing, statistical analysis, visualization, and insight generation**.
- Used **Pandas and NumPy** for data cleaning, transformation, processing, and exploratory data analysis.
- Integrated **OpenAI GPT-4o mini** for AI-assisted data interpretation and automated insight generation.
- Integrated **Groq** for fast LLM inference and experimentation with AI-powered data workflows.
- Designed the system to transform raw datasets into structured analysis and human-readable insights.
- Implemented **local LLM inference using llama.cpp**, enabling AI models to run locally without relying entirely on external APIs.
- Implemented automated **data profiling and exploratory analysis** to identify dataset structure, missing values, distributions, and patterns.
- Integrated **LLM-based analysis with traditional data science workflows** to generate automated, context-aware insights.

- Designed modular **data-processing pipelines and AI-powered analytics systems**.

Vizion – Python EDA & Visualization Library

PyPI Package

Python • Pandas • NumPy • Matplotlib • Seaborn

- Developed a reusable **Python library** focused on simplifying exploratory data analysis and data visualization workflows.
- Automated common data-analysis operations to reduce repetitive manual steps when working with datasets.
- Built functionality for structured **data processing, analysis, and visualization**.
- Designed reusable components to perform consistent data-analysis workflows across datasets.
- Simplified technical data analysis through reusable Python interfaces.

PDF Chat Assistant – RAG

Python • LangChain • OpenAI API • FastAPI • FAISS

- Built a **Retrieval-Augmented Generation (RAG)** chatbot for PDF question answering.
- Implemented document processing, text chunking, embeddings, and semantic search to retrieve relevant information from documents.
- Used **LangChain, OpenAI API, FAISS, and FastAPI** to build the application.
- Implemented **RAG pipelines** for context-aware question answering.
- Implemented **vector-based information retrieval** using embeddings and FAISS for efficient document search.
- Integrated **LLMs, vector databases, document retrieval, and backend APIs** into an AI application.

Home Loan Approval Prediction

Python • Pandas • NumPy • Scikit-learn • Matplotlib • Seaborn

- Built a **machine learning classification model** to predict home loan approval based on applicant and financial information.
- Performed manual **Exploratory Data Analysis (EDA)** to identify patterns, relationships, missing values, and important factors affecting loan approval.
- Cleaned and preprocessed the dataset by handling **missing values, categorical variables, and numerical features**.
- Applied **feature engineering and data preprocessing** to prepare applicant data for machine learning models.
- Trained and evaluated classification algorithms using **Scikit-learn** to predict loan approval outcomes.
- Applied **cross-validation** to assess model performance and improve the reliability of evaluation results.
- Evaluated model performance using **accuracy, precision, recall, F1-score, and confusion matrix**.
- Built an end-to-end **classification workflow** from raw data preprocessing to model evaluation and prediction.

Hirevia – AI-Powered Job Hunter Agent

Deployed App

Python • FastAPI • Ollama • Qwen • Llama.cpp • Telegram API • SQLite

- Built an AI-powered **job discovery agent** that automates multi-source job collection, reduplication, filtering, ranking, and LLM-based job relevance matching.
- Implemented **local LLM inference using Ollama** for AI-assisted processing and decision-making.
- Applied **prompt engineering** to improve the quality and consistency of LLM responses.
- Designed automation pipelines connecting **data collection, retrieval, LLM inference, and application logic**.
- Deployed the application on a **Linux VPS**.

CERTIFICATIONS

- Certified Data Scientist – NASSCOM
- Data Scientist – IABAC
- Data Scientist Intern – Rubixe AI Solutions
- Data Scientist Trainee Certificate

ACHIEVEMENTS

- **1st Place – Innovation Hackathon**, Modern College of Engineering
