Pintu Pandey

Artificial Intelligence | Machine Learning | Digital Transformation | Team Leadership

*Highly skilled professional with **8+ years of experience**; targeting assignments in **AI & ML or Digital Transformation** with an organization of high repute to drive mutual growth and lead high performing teams towards excellence.*

+91 9466392562 | LinkedIn | pintupandey89ai@gmail.com

Education

B.Tech in Computer Science from **RTU university, Kota** in **2012**

Core Competencies

- Machine Learning Model Deployment
- Generative AI Solutions
- Real-time Anomaly Detection
- Natural Language Processing Techniques
- AI/ML System Architecture
- AI Model Optimization
- Cloud AI Services
- Retrieval-Augmented Generation (RAG)
- Performance Monitoring and Reporting
- Stakeholder Management
- Cross-functional Collaboration

Certifications

- 5-day Generative AI Google course by Kaggle
- Generative AI Architectures with LLM, Prompt, RAG, Vector DB from Udemy

IT Skills

- **AI / ML:**
  - **Machine learning** – Scikit learn, Pandas, Numpy, Matplotlib, Seaborn.
  - **Deep learning** – Tensorflow, Keras, PyTorch
  - **Generative AI / Agentic AI** – LLMs (OpenAI, Gemini, llama, Gemma, GPT) Embedding models (SBERT, Gemini, Open AI), Vector DBs (Chroma, FAISS, Pinecone), Retrieval Augmented Generation (RAG), LangChain, Llamaindex, LangGraph.
- **Programming & Databases:** Python, SQL, API Development
- **Web Frameworks:** FastAPI, Flask, Node.js
- **Cloud & DevOps:** MLOps, ML Flow, AWS Sagemaker
- **Automation / BI / Other:** Power BI, Qlik Sense, Excel.

Profile Summary

- **Proficient in designing, developing, and implementing advanced AI/ML solutions** that resolve intricate business challenges and support strategic growth across industries.
- **Experienced in managing full-cycle AI/ML project execution**, including data preprocessing, model development, deployment, and optimization, ensuring effective and scalable outcomes.
- **Skilled in managing end-to-end AI/ML system integration**, ensuring that machine learning models are seamlessly embedded into business operations, improving process efficiency and decision-making.
- **Experienced in developing MLOps pipelines, establishing continuous integration and continuous deployment (CI/CD) practices for AI models**, ensuring automated workflows and model version control for seamless deployment and maintenance.
- **Skilled in utilizing vector databases (Chroma, FAISS, Pinecone)** to enable high-performance data storage, retrieval, and querying, supporting advanced **semantic search** and **knowledge discovery** for data-driven decision-making.
- Proficient in **Power BI and Qlik Sense,** with expertise in designing insightful and visually appealing **dashboards** tailored for CFOs and CEOs.
- Experienced in applying **Agile methodologies (Scrum)** to manage **AI/ML project development**, ensuring adaptive planning, incremental progress, and the timely delivery of high-quality results.

Work Experience

Manager, Digital Transformation | BDO India LLP | Jun 2023 – Sep 2025

- **Textile FinanceBot (Conversational AI for CFO):** Designed and implemented an AI-powered chatbot to assist CFOs in the textile industry with financial insights and FAQs. Defined the problem statement, prepared the Statement of Qualifications (SOQ), and built the technical architecture. Developed FAQ handling with semantic routing and integrated a Streamlit-based UI for seamless user interaction. Enhanced decision support by automating query resolution and enabling intuitive financial data access.

Manager | ITC Infotech | Jun 2022- Jun 2023

- **Healthcare Premium Prediction (Regression):** Developed a machine learning model to predict healthcare insurance premiums based on demographic and medical attributes. Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) to identify key cost drivers. Implemented regression algorithms (Linear Regression, Random Forest, XGBoost) and optimized hyperparameters to improve accuracy. Evaluated model performance using RMSE and R^2, enabling data-driven pricing strategies for insurers.

LTI - Larsen & Toubro InfoTech | Nov 2020 - May 2022

- **Credit Risk Modeling (Classification):** Built a machine learning model to assess creditworthiness and predict loan default risk using customer demographic, financial, and behavioral data. Conducted data cleaning, feature selection, and class imbalance handling (SMOTE/undersampling). Applied classification algorithms (Logistic Regression, Decision Trees, Random Forest, XGBoost) and fine-tuned hyperparameters for optimal performance. Evaluated models using AUC-ROC, precision, recall, and F1-score, delivering a robust solution to support risk-based lending decisions.

Previous Experience

Sr. Data Analysis | Team Computers | July 2019 – Nov 2020

Programmer Analyst | Aegis Pvt. Ltd | Nov 2016 – Mar 2018
