SUMMARY

Production Planning and Material Management professional with 4 years of experience in automotive manufacturing, specializing in S&OP, MRP, inventory control, and cost reduction. Proven track record in optimizing production continuity and driving process improvements.

EDUCATION

National Institute of Technology Meghalaya *2022*
B.Tech, Mechanical Engineering

EXPERIENCE

SCM - Production and Material Planner *Jul 2022 - Present*
Maruti Suzuki India Limited *Ahmedabad*

- Production Planning: Long-, mid- and short-term planning aligned with forecast demand, plant capacity and Annual Production Plan (APP).
- Prepare fortnightly firm and tentative production plans based on sales indents for vehicle and powertrain plants.
- Monitor daily production execution across Weld, Paint and Assembly; track OEE, OTIF and throughput and support recovery/contingency planning.
- Manage production plan adjustments for part shortages and line breakdowns through sequence and milestone tracking; schedule and route models across multiple lines.
- Material Planning: Manage part availability using lead time, reorder point, OTD, MRP schedules, safety stock, JIT and inter-plant part transactions.
- Control plant-level inventory, slow/excess and non-moving materials while maintaining optimum inventory and supporting cost reduction.
- Coordinate with Procurement, Quality, Engineering and Shopfloor teams to ensure material availability and on-time production.
- Support SOP, NPD and EOP activities, including ramp-up planning, phase-wise EOP planning and smooth production/material transitions.
- Maintain system parameters and BOM-related updates to support forecast accuracy, scheduling and smooth production planning; drive reporting/process improvements with IT collaboration.

PROJECTS

Production Planning & Material Management | *SAP-MM, Oracle ERP, Advanced Excel, MRP, JIT* Link

- Cost reduction through implementation of consumption-based ordering for optional parts.
- Supported smooth SOP of a new Transmission Shop and new plant from a material-planning perspective.
- Reduced inventory cost by identifying non-moving materials and maintaining optimum inventory levels.
- Supported EOP cost reduction through inventory tracking and phase-wise EOP volume planning.
- Automated daily Excel trackers to improve reporting efficiency and reduce manual effort.

TECHNICAL SKILLS

Cloud & Dev Tools: SAP-MM, Oracle ERP, Advanced Excel, Microsoft Office

Miscellaneous: Production Planning, Material Planning, S&OP, MRP, Inventory Management
