## PROFESSIONAL SUMMARY

Detail-oriented Electrical Engineering student (B.Tech pursuing) with a strong foundation in industrial automation, circuit design, and power distribution systems. Proficient in PLC & SCADA programming, MATLAB, and specialized technical analysis for engineering workflows. Demonstrated practical capabilities through a power substation internship and core hands-on automation and hardware projects. Seeking a challenging technical role to leverage engineering principles and automation skills in an industrial environment.

## CORE SKILLS

| | |
|---|---|
| **Industrial Automation:** | PLC & SCADA Programming, Relay Logic Control (RLC), Automation Systems |
| **Electrical Engineering:** | Power Distribution, Substation Operations, Circuit Design, Electrical Safety, Load Management |
| **Technical Tools:** | MATLAB, MS Excel, MS Word, MS PowerPoint |
| **Programming & IoT:** | Python, Internet of Things (IoT), Data Acquisition Systems |
| **Soft Skills:** | Teamwork, Collaboration, Problem Solving, Technical Documentation |

## PROFESSIONAL EXPERIENCE & TRAINING

**Power Distribution Intern** 08/07/2025 – 07/08/2025 | Prayagraj, UP

*33/11 kV Power SubStation, Civil Lines*

- Monitored high-voltage power distribution networks and grid substation operations.
- Assisted in daily load management tracking, equipment monitoring, and routine maintenance procedures.
- Followed standard electrical safety practices, protective grounding protocols, and operational safety rules.

**PLC & SCADA Trainee** 10/07/2025 – 29/07/2025 | Industrial Training

*Softronic Automation*

- Developed, simulated, and tested PLC ladder logic programs for industrial automation workflows.
- Configured SCADA supervisory control interfaces for real-time process monitoring and data visualization.
- Analyzed automation control logic configurations to improve system efficiency and process reliability.

## ACADEMIC PROJECTS

**Obstacle Avoiding & Line Follower Automated Systems** Academic Development

- Engineered autonomous micro-controller based mobile systems utilizing IR and ultrasonic sensing arrays.
- Programmed motor driver control algorithms for directional guidance and real-time obstacle avoidance.

**Laser Security & Wire Break Automation Alarm Systems** Academic Development

- Designed hardware circuitry for low-latency security infrastructures using operational amplifiers and sensors.
- Mapped electrical schematics to chart proper sensory input pathways and alarm transistor thresholds.

## EDUCATION

**B.Tech in Electrical Engineering** Pursuing

*Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow*

**Diploma in Electrical Engineering** Passed: 2023

*Board of Technical Education Uttar Pradesh (BTEUP) | Score: 72.92%*

**High School (Class X)** Passed: 2020

*Central Board of Secondary Education (CBSE) | Score: 45.2%*

## CERTIFICATIONS & WORKSHOPS

- **PLC & SCADA Programming Certification** – Softronic Automation
- **Relay Logic Control (RLC) Workshop** – Core Electrical Automation Training
- **Internet of Things (IoT) Workshop** – Connected Embedded Systems Frameworks
