## Certification

- Certified Procurement Professional (CPP)

## Profile

- Procurement and global sourcing professional with 12+ years of techno-commercial experience across strategic sourcing, category management, supplier negotiation, contract management, e-sourcing and procurement transformation.
- Experienced in managing global procurement portfolios exceeding $210M, developing category strategies, executing competitive sourcing, optimizing spend and managing suppliers across regional and global markets.
- Recognized for combining technical knowledge with commercial acumen to develop scalable sourcing solutions.
- Known for building collaborative relationships with cross-functional stakeholders, challenging conventional sourcing approaches, and delivering sustainable commercial outcomes through data driven decision making and structured supplier governance.

## Commercial Impact

- Developed procurement business cases securing executive approval for strategic sourcing initiatives delivering approximately 30% commercial value improvement.
- Established the Electrical & Automation category from inception by developing supplier capability, sourcing frameworks and commercial procurement strategies leading to increase in the revenue of organisation.
- Reduced manufacturing cost by approximately 40% through reverse engineering, supplier development and commercial evaluation of alternative sourcing solutions.
- Supported procurement transformation through implementation of Contract Lifecycle Management (CLM), Oracle enhancements and procurement process standardization.

## Professional Experience

Category Manager - Svitzer (Oct 2025- Present )

Key responsibilities:

- Lead category management for technical categories across the AMEA region, developing procurement strategies that balance commercial objectives, supplier capability and operational requirements while supporting regional business priorities.
- Managed the complete contract lifecycle for strategic supplier agreements including sourcing strategy, commercial negotiation, implementation, governance, supplier performance and renewals.
- Directed regional sourcing initiatives from opportunity assessment through supplier selection, commercial evaluation, negotiation and contract execution.
- Strengthened supplier governance through structured KPI reviews, business scorecards and supplier development initiatives.

**Fleet Management Limited** (Dec 2023- Sept 2025 )
Category Management Specoalist

- Managed spend >250m$ through strategic procurement across global marine categories supporting fleet operations, developing sourcing strategies that improved commercial performance, supplier capability and procurement governance while ensuring uninterrupted operational support.
- Redesigned sourcing approaches through supplier benchmarking, commercial evaluation and long-term contracting, delivering 8–15% procurement savings while improving supplier performance.
- Managed end-to-end Source-to-Contract activities including category planning, market analysis, RFx management, commercial evaluation, negotiation, contract implementation and supplier performance governance.
- Contributed to procurement transformation by supporting implementation of Contract Lifecycle Management (CLM), ERP enhancements, UAT and procurement process standardization.

**Maersk Line** (Dec 2020 - Nov 2023 )
Category Buyer

Key responsibilities:

- Supported global category management for Electrical & Automation procurement, contributing to sourcing strategies, commercial evaluations and procurement governance within a structured global procurement organization.
- Developed supplier performance reviews and commercial insights that supported continuous improvement and informed procurement decision-making.
- Partnered with Technical, Operations and Finance stakeholders to align procurement decisions with business priorities, asset reliability and total cost of ownership.

**Marine Power International FZC** (Oct 2017 - Nov 2020 )
Assistant Procurement Manager

Key responsibilities:

- Led procurement initiatives supporting category development, supplier expansion and product commercialization, strengthening procurement capability.
- Identified and developed alternative global suppliers, improving supply resilience, commercial competitiveness and sourcing flexibility.
- Led reverse engineering initiatives that reduced manufacturing costs by approx. 40%.
- Developed supplier capability through structured qualification, performance monitoring and continuous supplier engagement.

**Greta Energy Limited** (Oct 2014 - Sep 2017 )
Procurement Engineer

Key responsibilities:

- Provided technical procurement support for thermal power plant operations, ensuring timely availability of critical equipment while balancing operational reliability and inventory optimization.
- Managed procurement of technical spares, electrical equipment and maintenance materials supporting uninterrupted plant operations.
