**ANAND GUPTA**
Senior Engineer – Process Control Instrumentation (Polyester Industry)
Silvassa | +91 7208176753 | anand.gupta3160@gmail.com

**PROFESSIONAL SUMMARY**

Process Control Instrumentation professional with strong experience in polyester manufacturing plants. Hands-on exposure to (Oerlikon Barmag) POY, FDY, transfer line, and Barmag winder systems. Well-versed in field instrumentation, PID control loops, control valve calibration, PLC/SCADA coordination, VFDs, and UPS systems. Experienced in preventive, breakdown, and shutdown maintenance along with ISO documentation.

**CORE TECHNICAL SKILLS**

- Process Instrumentation: Pressure, Temperature, Flow, Level
- Polyester Plant Equipment: POY, FDY, Transfer Line, Barmag Winder
- Control Systems: PID Controllers, Loop Checking, Loop Tuning
- Control Valves: Actuators, Positioners, Calibration
- Automation Interface: PLC, SCADA, Yaskawa VFDs
- Electrical Knowledge: Motor Starters (DOL, RDOL, Star-Delta)
- Power Systems: Hitachi Online UPS
- Documentation: ISO Calibration Records, SOP Compliance
- Maintenance: Preventive, Breakdown, Shutdown
- SAP(HANA): module for preventive and breakdown maintenance activities

**PROFESSIONAL EXPERIENCE**

**Senior Engineer – Instrumentation**
Bhilosa Industries Pvt. Ltd. -5 | June 2025 – Present

- Maintenance and calibration of field instruments for polyester processes
- Instrumentation support for POY, FDY, transfer line, and Barmag winder systems
- Control valve calibration and PID loop monitoring
- Maintenance of Hitachi online UPS systems
- ISO documentation, calibration records, and audit support
- Exposure to pneumatic instruments such as PRVs, solenoid valves, and actuator-operated control valves
- Maintenance of industrial valves including ball valves, butterfly valves, globe valve, actuator valves
- Handling and troubleshooting of industrial sensors such as capacitive level sensors, inductive proximity sensors, and magnetic speed sensors
- Handling DCS system (Yokogawa) including AI,AO,DI.DO cards,Marshalling panels,control logic monitoring,and alarm handling
- Carried out loop testing and validation of 4-20 mA with HART communication digital signal
- Worked on SAP(HANA) module for PM module,Familiar with work order creation

**Senior Engineer – Instrumentation**
Alok Industries Ltd., Silvassa | Aug 2022 – May 2025

- Operation, configuration, and alarm handling of temperature controllers such as Yokogawa and Selec
- Installation, calibration, and troubleshooting of pressure transmitters (Dynisco) used in polymer and extrusion process
- Field instrumentation handling including RTD (PT100) and thermocouples (J & K type) for accurate temperature measurement
- Maintenance and troubleshooting of inverters, PLC I/O modules, with basic knowledge of repairing electronic cards
- Calibration and functional testing of pressure, temperature, flow, and level transmitters
- Loop checking, installation, and removal of field instruments
- Shutdown maintenance and coordination with production teams
- Preventive and breakdown maintenance to ensure minimum downtime and smooth plant operation
- Compliance with safety procedures and coordination during shutdown and commissioning activities

**Service Engineer - Instrumentation**

Electrotack Electronics Solutions Pvt. Ltd. | Nov 2020 – Aug 2022
• On-site instrumentation support at Alok Industries LTD. as third-party service engineer
• Service support for POY 2/3 plant of Alok Ind. (Oerlikon Barmag) winder machines
• Troubleshooting of PLC modules, HMI panels, and industrial electronics
• Perform calibration, service & repair, troubleshooting and functional test of field instruments like transmitters, gauges, temperature instruments, control valves, pressure switch and all other E&I; equipment
• Maintain the spare parts record related in electrical & electronics instruments field
• Total plant maintenance work including corrective and preventive maintenance in the field of process instruments
• Managing and scheduling the customers for PM and all other services

**Production Engineer – Process Control Instrumentation**

Ambetronics Engineers Pvt. Ltd. | Jul 2019 – Aug 2020
• Calibration and testing of temperature controllers and data scanner, data logger
• Working with RTD, thermocouple (J, K, R, S, T), 4–20 mA and 0–10 VDC signals
• Field assistance during installation, plant start-up, shutdown, and troubleshooting

**CERTIFICATIONS & TRAINING**

• Industrial Automation Training – Precon Automation & Systems Pvt. Ltd.
• PLC: Allen Bradley (Micrologix series), Siemens S7-1200, Delta PLC
• SCADA & HMI: Intouch, eView Designer (basic configuration)
• Control Panels: DOL, RDOL, Star-Delta wiring and testing
• AC Drives (VFD): Programming and troubleshooting

**EDUCATION**

B.E. in Electronics Engineering – Vidyalankar Institute of Technology(Mumbai University) CGPA 6.11 June 2019

Anand Gupta
