Aditya Kumar Sahoo

Mechanical Engineer

4 Years 1 Month | +91 9078840829 | sadityakumar16@gmail.com

> "Seeking assignments in Hydraulic and Mechanical equipment Erection, Commissioning & Maintenance with an organization of repute, offers opportunities for advancement."

Core Competencies

- Project Execution
- Erection & Commissioning
- Hydraulic Maintenance
- Hydraulic Troubleshooting
- Mechanical Maintenance
- Preventive Maintenance
- Breakdown Maintenance
- Breakdown Analysis
- Failure Mode Analysis
- Corrective Action
- HSE management
- Spare Planning & Inventory Management

Technical Skills

- MS Office
- SAP Material Management
- SAP Plant Maintenance

Education

- Diploma in Mech. Engg.
- B tech in Mech. Engg.

Personal Information

Date of birth: **04-Feb-2001**
Gender : Male
Address : H.N 329, Garapada, Sagadailo, Niali,Cuttack, Odisha 754294

Professional Objectives

- Competent professional with 4 + years of expertise in Hot Strip Mill Project, Commissioning, Hydraulic & Mechanical Maintenance, Inventory and Man Management.
- Strong communication, interpersonal, analytical & team building skills with proficiency at grasping new concepts quickly and utilizing the same in a productive & constructive manner.
- High on innovative thinking capable of taking challenging targets with strategic outlook to devise and execute strategies as per circumstances.

Profile Summary

- 02+ Years of hands-on experience on **Reheating Furnace Project** from Concept to **Commissioning** and Production stabilization within target timeline and budget.
- 02+ Years of expertise in Hot Rolling Mill **Hydraulic and Mechanical Maintenance.**
- 01+ Years of **Spare Planning** & Inventory Management with respect to managing Cost as Supply Chain Executive.
- Coordinated activities related to **SAP** Material Management Module & Plant Maintenance Module. Creation of Maintenance Plan, revising schedule, Frequencies, Task lists, Monitoring Compliance, etc. as & when required.

Organizational Experiences

Presently associated with **Tata Steel limited, Kalinganagar** since 18th March 2024 to till date and working here as Mechanical Engineer in **Hot Strip Mill Mechanical maintenance.**

Key Areas of Responsibilities: -

Tata Steel Limited

Mar 2024 – Till date

Mechanical Engineer
Hot Strip Mill

TATA STEEL
#WeAlsoMakeTomorrow

Project & Commissioning

- Erection and commissioning of 02 no's walking beam type Reheating Furnace of capacity 350 t/h each, in TATA Steel, Kalinga Nagar, supplied by Tennova Italy.
- Play vital role as part of Project & Commissioning Team on Mechanical Engineering and Construction for the new Reheating Furnace. Ensure the new facility is designed for optimal operability and maintenance.
- Planning of Job & resources like materials, equipment & manpower for fabrication/erection &completion of the same within the stipulated time.
- - Performed equipment inspection, alignment checks, trial runs and commissioning support for critical mechanical equipment.
- - Coordinated with OEM, project, operations, electrical and instrumentation teams during installation, testing and commissioning activities.
- - Supported troubleshooting during cold trials, hot trials and production commissioning of furnace equipment.
- - Participated in equipment punch-point identification, rectification, trial and final handover.
- - Prepared and maintained equipment inspection reports, punch-point lists, maintenance records and commissioning documentation.
- Provide technical support for the project management group, from the feasibility study phase to the coordination of final acceptance tests, ensuring the technical quality, as well as ensuring correct technical documentation after commissioning. (Protocols)
- Single function testing (SFT) & commissioning of Hydraulic & mechanical Equipment.

➢ Maintenance (Hydraulic & Mechanical)

Reheating Furnace (RHF)

- Maintenance and troubleshooting of RHF walking beam mechanisms, charging and discharging machines, hydraulic systems and furnace auxiliaries.
- Hands-on troubleshooting of hydraulic pumps, hydraulic cylinders, control valves, proportional valves, hydraulic power packs and associated piping.
- Monitoring hydraulic parameters including pressure, flow, temperature, leakage and motor current.

- Maintenance of centrifugal air fans, dilution air fans, lubrication systems and furnace mechanical auxiliaries.
- Inspection and troubleshooting of walking beam, charging and discharging mechanisms.
- Participation in equipment trials, restoration activities and emergency breakdown maintenance.

Roughing Mill (RM)

- Mechanical maintenance of Roughing Mill equipment, roll changing systems, feed/entry equipment and mill auxiliaries.
- Maintenance and troubleshooting of hydraulic cylinders, valves, lubrication systems, bearings, gearboxes and couplings.
- Involved in R1/R2 roll change activities, equipment inspection and post-maintenance trials.
- Identification of abnormal conditions such as leakage, vibration, abnormal noise, temperature rise and component wear.
- - Coordinated with Operations and Electrical teams during breakdowns and equipment restoration.

MAINTENANCE RESPONSIBILITIES

- Execute shift-wise breakdown, preventive and predictive maintenance activities.
- Analyze equipment failures and implement corrective and preventive actions.
- Prepare and monitor shift maintenance plans, pending jobs and critical equipment status.
- Coordinate manpower, tools, spares and permits for maintenance activities.
- Execute planned shutdown maintenance, including inspection,

replacement, alignment and commissioning.

- Maintain equipment history and identify critical spares and recurring failure points.
- Conduct RCFA and FMEA for critical and repetitive failures.
- Ensure proper LOTOTO and job safety compliance before maintenance activities.
- - Coordinate with Operations, Electrical and Instrumentation departments for equipment trials and restoration. .
- Creation & execution of **Preventive Maintenance**, quality review of Preventive Maintenance results, new Preventive Maintenance development as per need.
- Responsible for scheduling, planning and execution of short and long-term maintenance activities and for securing cost and availability for effective preventive maintenance.
- Ability to read and understand **Hydraulic and Mechanical drawings** to include P&ID's. Develop necessary drawings to improve & modify existing design by Kaizen methodology.
- Identifying areas of obstruction / breakdowns and taking steps to rectify
- Expertise in **positive isolation**. Trained up to level 2, working as Isolating person and Isolation planner. Perform and assist in LOTOTO of equipment, systems, and sub-systems.
- Implement, Maintain & improve safe working condition,
- Preparation of Standard Operating Procedure, Hazard Identification & Risk Assessment, Job Cycle Check (SOP, HIRA, HAZOP and JCC)
- Has been actively involved in TPM (Total Productive Maintenance), 5S implementation and model workplace.

➢ Spare Planning

- Proactively involve in Spare planning, Spare Indent and Sub store Inventory management.
- Fair Knowledge in **SAP-MM module**, Easy Buy, UMC and USC system.
- Preparing spare part list as per BOM & ensuring the availability of spares.
- Assist in departmental budget preparation & inventory management.

Automation & Technical Services At Tata Steel limited, Meramandali

Maintenance (Hydraulic & Lubrication)

- Conducted preventive maintenance and handled breakdown

maintenance of Mechanical equipment and hydraulic systems in the Hot Strip Mill Furnace and Mill area.

- Carry out preventive, predictive and breakdown maintenance of Roughing Mill mechanical systems and associated equipmen
- Assisted superior in spare planning and procurement, creating purchase requisitions through SAP. Sub-store upkeeping & spare inventory management.

Sep 2022 – Feb 2024

Site Engineer
Hot Strip Mill

- Troubleshooting and maintenance of hydraulic systems, hydraulic cylinders, valves, pumps, accumulators and piping circuits associated with Roughing Mill operations
- Attend & rectify all shift breakdown of Hydraulic system with optimum resources.
- Perform root cause analysis (RCFA) for recurring equipment failures and implement corrective and preventive actions
- Planning various shutdown and measure shutdown planning and smoothly executions.
- Scheduled regular inspection and maintenance of equipment.
- Implement, Maintain & improve safety practices in workplace.
- Responsible for execution of operations & maintenance of all oil conditioning units.

Courses & Certifications.

- AutoCAD at CTTC, BBSR.
- Post Graduate Diploma in Computer Application (PGDCA).
- Entrepreneurship and Skid Development Program by MSME-DI.
