Summary

Experienced Document Control Coordinator and Mechanical Engineer with a background in power plant operations and managing project documentation in Oil & Gas and Energy projects from Pre-FEED to Handover. Proficient in EDMS tools like Aconex, SharePoint, SAP, and other EDMS platforms. Hands-on experience in combined-cycle power plant operations has developed sharp analytical thinking, attention to detail, and a strong grasp of complex engineering systems—enhancing understanding of technical documents and coordination across EPC teams. Known for ensuring compliance with CFIHOS and IM standards, streamlining document workflows, and onboarding project teams effectively to ensure documentation integrity and project success.

Skills Summary

- **Technical Skills:**
- EDMS Platforms: Aconex, SharePoint, SAP, Web BFS, DocuSign, Power BI, AutoCAD
- Microsoft Office: Word, PowerPoint, Excel
- Document Control & Compliance: CFIHOS, IM Standards, Engineering & Procurement Coordination, Engineering documentation standards (Oil & Gas)
- **Soft Skills:**
- Communication & Team Collaboration
- Problem-Solving & Decision-Making
- Leadership & Training
- Project Management & Coordination
- Project Monitoring & Stakeholders management

Work Experience

L&T Technology Services Ltd. Feb 2023 - Present

Document Controller (Project Control Specialist) | Engineer | Vadodara

- Supported engineering teams and Project Engineering Managers (PEM) in managing documentation across all project phases (Pre-FEED to Handover), ensuring accuracy, confidentiality, and timely execution.
- Managed internal document workflows, version control, and approvals using Aconex and SharePoint, facilitating the structured release of engineering deliverables in line with project requirements.
- Maintained and updated Master Document List (MDL) and Document Distribution Matrix (DDM), tracking incoming and outgoing transmittals to clients and vendors.
- Collaborated with engineers and PEMs to track and compile Customer Reply Sheets, following up on outstanding actions and ensuring timely closures.
- Supported the compilation and validation of design freeze documents and certifications by gathering confirmations from internal teams and project partners.
- Assisted in generating document numbers, creating structured project folders aligned with PTS (Project Technical Specifications), and ensuring correct document placement.
- Generated metadata-driven reports such as PTS Reports, overdue trackers, and MDR updates, enabling project managers to track document status and deliverables.
- Monitored and coordinated responses to customer comments, ensuring timely closure and proper documentation of replies from internal teams and partners.

- Contributed to the creation and maintenance of PTS folders for project partners, ensuring synchronization between internal and external documentation.
- Controlled and followed up on project correspondence and communications using Aconex, SharePoint (EDMS Tools) , supporting both internal coordination and external communication protocols.
- Assisted in collecting, verifying, and compiling As-Built documentation packages for final submission, ensuring alignment with project closure requirements.
- Authored and implemented Information Management procedures based on CFIHOS and industry standards, promoting consistency and compliance.
- Led document on boarding and compliance guidance for EPC contractors and vendors, ensuring adherence to metadata standards and document workflows.
- Managed bid activities within the Aconex Tender Module, including tender document uploads, vendor tracking, query resolution, report generation, and support during the evaluation process to streamline procurement operations.
- Trained and supported new team members by providing operational guidance, on boarding assistance, and best practices in documentation strategy, enhancing team efficiency and accuracy.

Torrent Power Ltd. Sep 2020 – Feb 2023

Shift Operation Engineer | Surat & Dahej

❖ Documentation & Compliance

- Managed technical documentation using SAP and BFS software, ensuring accurate tracking, compliance reporting, and streamlined data management for plant operations.
- Compiled & reviewed log sheets, maintaining accuracy in monthly reports, maintenance records, and legal compliance filings for audits.
- Oversaw documentation workflows for startup/shutdown procedures, preventive maintenance records, and shift-wise operational logs to ensure traceability.
- Tracked gas and hydrogen system operations, recording PRV skids, heaters, emergency stop valves, and compressor processes for compliance.
- Maintained equipment testing logs for Black Start Diesel Generators, Emergency Diesel Generators, and fire-fighting systems, ensuring adherence to safety protocols.
- Led emergency response documentation, recording deluge valve tests, detector verifications, and emergency drive assessments for audits.
- Supported site progress, quality, and safety monitoring by preparing inspection checklists, SOPs, and project closure documentation as per requirements.

❖ Technical Operations

- Operated & monitored a 1,530 MW combined-cycle power plant with single-shaft configuration, ensuring smooth operations via Siemens T3000 DCS.
- Led real-time monitoring of Gas Turbines (Siemens SGT5-4000F), Generators, Steam Turbines, and HRSG, optimizing efficiency.
- Executed routine trials for Boiler Feed Pumps, Condensate Pumps, Circulating Water Pumps, ensuring reliability.
- Managed plant startup & shutdown activities, overseeing critical parameters for turbines, generators, and HRSG.
- Handled switchyard operations, managing 400KV GIS, 400KV AIS & 220KV AIS transmission systems for grid stability.
- Performed routine checks on water treatment plants, DM systems, HVAC, and raw water processing to ensure operational integrity.
- Implemented preservation measures for HRSG, Gas Turbines, and Steam Turbines to maintain asset longevity.
- Supervised switchgear operations, managing HV (6.6 KV), MV (415 V), and UPS switchgear, ensuring efficient power distribution.

Internship & Academic Project

- **Reliance Industries Ltd** Jun 2019 – Jul 2019
  Mechanical Engineer Intern | Surat
  - Observed mechanical systems in petrochemical and air separation units, gaining hands-on exposure to industrial equipment operations, safety protocols, and maintenance practices in oil & gas processing.
- **Project: Bladeless Wind Turbine**
  - Designed a bladeless turbine based on vortex shedding to convert wind energy into electricity. Focused on low-maintenance, safe, and cost-effective energy generation for urban applications.

Education

- **L.D. College of Engineering | Ahmedabad | Jun 2020**
  Bachelor of Engineering (B.E.) – Mechanical Engineering | **CGPA: 8.34**
- **I.N. Tekrawala High School | Surat | Mar 2016**
  Higher Secondary Certificate (HSC) | **Percentage: 87%**
- **I.N. Tekrawala High School | Surat | Mar 2014**
  Secondary School Certificate (SSC) Mar 2014 | **Percentage**: **89%**

Achievements & Extracurricular Activities

- Received SPOT Award for successfully managing and completing bid activity, ensuring a smooth procurement process and seamless vendor coordination.
- Earned client appreciation for the successful completion of the Pre-FEED stage of an oil & gas EPC project, meeting strict compliance and quality benchmarks.
- Led corporate social responsibility (CSR) initiatives, supporting underprivileged and malnourished children in villages near Dahej, Gujarat, promoting education and healthcare efforts.
- Engaged in community service programs, providing aid and support in slum areas of Surat, Gujarat, advocating for social welfare and sustainable development.

About Me

- Marital Status: Unmarried
- Birthdate: 08/10/1998
- Languages Known: English, Gujarati, Hindi, Marathi
