Candidate Snapshot
Backend developer with three years of experience designing APIs, data pipelines and internal tools for product teams. Comfortable owning features end to end, from database schema to deployment and monitoring.

Skill Inventory
Python, FastAPI, REST APIs, SQL, PostgreSQL, Pandas, NumPy, Docker, Git, Linux, Redis, Celery, pytest, and CI pipelines. Also experienced with basic machine learning workflows using scikit-learn.

Professional Journey
Software Developer at Nexwave Systems, Pune, from June 2023 to present. Data Analyst at BrightMetrics, Mumbai, from July 2021 to May 2023, working on reporting automation and dashboards.

Role Contributions
Designed and maintained REST services used by five internal teams, reviewed code, mentored two junior developers, automated weekly data quality checks, and documented deployment runbooks.

Learning Journey
Master of Computer Applications from Savitri Institute of Technology, Pune, completed in 2021. Bachelor of Computer Applications from City College, Nashik, completed in 2019.

Build Showcase
Invoice Parser: OCR plus FastAPI service that extracts fields from vendor invoices. Stock Watch: a small alerting tool that tracks price movements and emails a daily digest to subscribers.

Credential Vault
AWS Certified Cloud Practitioner, earned in 2024. Google Data Analytics Certificate, completed in 2023, along with an internal Docker and Kubernetes training programme.
