MOHAMMED KHIZER SHARIFF

Technical Program Manager | MarTech & Web Platform Delivery | Client-Facing Technical Leadership | AI-Assisted Engineering Execution
Bengaluru, Karnataka, India | +91-9731437210 | mdkhizer.shariff0@gmail.com | linkedin.com/in/mohammed-khizer-shariff

PROFESSIONAL SUMMARY

Technical Program Manager with 4+ years of experience progressing from an engineering foundation into technical delivery and client-facing leadership, owning end-to-end execution for enterprise MarTech, web platform, and AI/GenAI engagements. Acts as single delivery owner across concurrent client accounts — leading requirement discovery, converting business and marketing needs into structured execution plans, milestones, and delivery roadmaps, and partnering with solution SMEs and domain experts to define the right technical and MarTech solutions. Hands-on technical leadership spanning full-stack web application development, CMS and MarTech execution (WordPress, Adobe Experience Manager (AEM), Headless CMS/Contentful), API integrations, system architecture, and the broader MarTech ecosystem — content, SEO, analytics, and digital experience platforms. Drives sprint planning, execution tracking, risk management, and dependency resolution with strong delivery governance, and leverages AI-assisted tools (ChatGPT, Cursor) and automation to improve delivery efficiency, quality, and speed. Track record includes 95% on-time delivery, 22% sprint velocity gains, and direct C-suite/client stakeholder management across Fortune 500 and enterprise accounts including KPMG, Bosch, and HSBC. Engineering foundation from a B.E. in Electrical & Electronics Engineering and a PG Diploma in Industrial Automation.

TECHNICAL SKILLS

Program & Delivery Execution: Sprint Planning, Execution Tracking, Dependency Resolution, Delivery Predictability, Backlog Management & Health, Spillover & Cycle-Time Tracking, Spec-Driven Development, RAID & Risk/Issues Log Management, Escalation Management, Meeting Cadence Management, Minutes & Action Item Tracking, Status Reporting to Senior Leadership & Clients, Product Delivery, Product Operations, Roadmap Management, Cross-Functional Resource Coordination & Leadership, Leading Through Influence (No Direct Authority), Client & Engagement Ownership, Single-Owner Delivery Model (2–3 Concurrent Engagements), Cross-Functional Product Teams, Resource Planning & Capacity Management, Project Schedule Management, Project Deliverables Management, On-Time Launch Management, Cost, Quality & Delivery Management, Regional Project Management, Project Governance Approvals

Web, CMS & MarTech: Full-Stack Web Application Development, CMS & MarTech Execution (WordPress, Adobe Experience Manager (AEM), Headless CMS, Contentful), MarTech Ecosystem (Content, SEO, Analytics, Digital Experience Platforms), Requirement Discovery & Solution Alignment, Solution SME Partnership, Technical Feasibility & Scalability Planning

Technical & Systems Fluency: System Architecture, APIs & Service Integration, Frontend/Backend/ML Coordination, Full SDLC (Specs, Code Review, CI/CD, Testing/QA, Release, Monitoring), Design Doc / PRD Review

AI & GenAI: Agentic AI, AI Agent Orchestration, RAG, LLM Fine-Tuning (GPT-4, Open-Source), Prompt Engineering, AI-Assisted Engineering & Automation-Driven Workflows (ChatGPT, Cursor), Intelligent Document Processing, AI-Based Document/Data Defect & Error Detection, OCR, NLP, Computer Vision, Azure OpenAI, LangChain, LlamaIndex, Vector Databases (FAISS, Pinecone, Chroma), ML Pipelines, Python, SQL

Delivery Frameworks: Agile, Scrum, Kanban, SAFe, Waterfall, Hybrid Delivery, Stage-Gate / New Product Development (NPD) Process, NPD Projects, Product Development Lifecycle, Product Launch / Launch Readiness, RFQ-to-Release Lifecycle Coordination, Release Management, CI/CD, Customer Sign-off & Project Handover

Tools & Platforms: JIRA, Azure DevOps, Confluence, MS Project, ServiceNow, Smartsheet, ZOHO Projects, Trello, MS Excel (Advanced), Tableau, Power BI, Microsoft Dynamics 365, Cloud Applications

Program, Governance & Financial: PMO Governance, Program Roadmapping, Portfolio Management, Budget Forecasting, P&L Oversight, EVM, Vendor & Partner Management, Executive & Client Stakeholder Communication, KPI/OKR/SLA Reporting, Strategic Planning, Execution Ownership & Talent Development, Customer Experience, Service Operations, B2B SaaS

KEY ACHIEVEMENTS

95% On-Time Delivery | 80+ Projects Delivered | 22% Sprint Velocity & Predictability Gain | 41% Data Error Reduction | 97% SLA Adherence | 15% Cost Savings

PROFESSIONAL EXPERIENCE

Technical Program Manager / AI Program Manager **March 2026 – Present**
CogniQuest AI — Bengaluru, India

- Own end-to-end delivery for an AI-driven Intelligent Document Processing pod, partnering closely with Engineering and Product on Agentic AI orchestration, RAG pipelines, and Azure Form Recognizer — hitting 95% on-time delivery and cutting time-to-market 20%.
- Act as primary technical and delivery owner for the engagement, leading requirement discovery with stakeholders and converting business needs into structured execution plans, milestones, and delivery roadmaps.
- Managed end-to-end project schedules, cross-functional resources, deliverables, cost, quality, and delivery milestones through stage-gate governance, securing leadership sign-off at each phase of the product development lifecycle.
- Lead cross-functional pod ceremonies (sprint planning, stand-ups, reviews, retrospectives) across AI/ML, Backend, and QA in JIRA — leading through influence across teams with no direct reporting line — improving sprint velocity 22%, strengthening sprint predictability, and cutting backlog 30%.
- Run a structured cadence of project and stage-gate governance meetings, documenting minutes and maintaining action item/action-rail trackers, following up with owners to keep delivery unblocked.
- Built Agentic AI workflows where autonomous agents handle multi-step document extraction, validation, and routing, cutting manual intervention 45%.

- Designed RAG pipelines pairing vector databases (FAISS, Pinecone) with LLMs for context-aware document Q&A, improving retrieval accuracy 33%.
- Ran fine-tuning on domain-specific LLMs, including GPT-4 and open-source models, lifting entity-extraction precision 18% on regulated client datasets while maintaining data quality and security standards.
- Took OCR pipeline accuracy from 84% to 96% and cut data validation errors 41% through business rule and fuzzy-matching frameworks — held 97% SLA adherence throughout.
- Owned P&L, budget forecasting, and stakeholder management across multiple enterprise accounts, driving renewals and upsell, and maintained risk/issues registers with proactive escalation to leadership.

Technical Program Manager **August 2025 – February 2026**

G7CR Technologies India Pvt Ltd — Bengaluru, India

- Ran Agile/Scrum and SAFe ceremonies, including sprint retrospectives, across eight delivery teams and delivered KPI/OKR/SLA dashboards to C-suite leadership.
- Drove GenAI program delivery including LLM-powered automation, AI agent orchestration, and Azure OpenAI integrations.
- Directed program roadmaps and a portfolio of 40–50 concurrent projects spanning multiple product lines — Azure Cloud, Data & AI, GenAI, Software Development, Networking, and Data Centre Infrastructure — on time, in scope, on budget, applying stage-gate checkpoints from intake through on-time launch.
- Reduced project disruption incidents 30% through proactive risk register and RAID log management across all programs, surfacing risk early and escalating appropriately.
- Owned budget forecasting, P&L oversight, and cost control for the full portfolio, correcting overruns before they hit margins.
- Standardized PMO workflows, SOW governance, and billing reconciliation, keeping delivery consistent and OKR-aligned.

Technical Program Manager **April 2024 – August 2025**

Infocore Technologies Pvt Ltd — Bengaluru, India

- Delivered 10+ Cloud, IoT, Data & AI, Network Security, and SaaS projects for KPMG, Bosch, HSBC, JW Marriott, and BEIC, all within scope, schedule, and budget.
- Directed API integrations and full-stack workflow automation across service boundaries for client-facing web platforms, cutting client manual effort 35%.
- Managed Fortune 500 client relationships directly, presenting program status and governance updates to C-suite stakeholders and handling escalations, executive briefings, and project handover.
- Led change management for enterprise system rollouts and maintained ISO 9001 compliance and PMO documentation across every delivery phase.

Project Manager **March 2023 – April 2024**

Tejas Networks Pvt Ltd — Bengaluru, India

- Ran Agile/Scrum ceremonies and authored BRDs, SRS documents, and SOPs — specifying work before build — while sustaining ISO 9001 compliance.
- Managed IT infrastructure, 4G/5G networking, automation, and software deployment projects across concurrent workstreams from kickoff through closure, including post-implementation reviews and client sign-off.
- Owned budget tracking and P&L reporting, and led LAN/WAN infrastructure migrations with zero business disruption.

Project Coordinator / Electrical Engineer **June 2022 – December 2022**

Supreme Electricals — Bengaluru, India

- Coordinated PLC-based automation, deployment, and commissioning across manufacturing system integration projects on factory-floor production lines, improving operational efficiency 15%.
- Built real-time KPI and cost dashboards in Excel and Tableau to support management decision-making.

EDUCATION

HMS Institute of Technology

Bachelor of Engineering (B.E.) — Electrical & Electronics Engineering | 2019 – 2023

- CGPA: 7.5 / 10.0

CERTIFICATIONS & TRAINING

- PG Diploma in Industrial Automation (PGDIA)
- SAFe Agilist
- Agile Methodologies (Scrum & Kanban); Project Management: Technical Projects — LinkedIn Learning
- AI Fundamentals; CRM — Hewlett Packard Enterprise
- Project Manager Job Simulation — Siemens
- Microsoft Dynamics 365 Functional Consultant Training
- Data Science & AI/ML — Bessant Technologies
