- **Languages:** Python, Java, C language, SQL, HTML, CSS
- **Business Analysis:** Requirements Gathering, Agile Methodology, Data Modelling, Process Mapping, SWOT Analysis, Agile & Scrum, Cost-Benefit Analysis, manual testing.
- **Soft skills:** Communication, Adaptability, Problem Solving, Teamwork, Collaboration, Time management.

PROJECTS

PMT (Pune Municipal Transport) Pass System | Java (JSP), HTML, CSS, JavaScript, PostgreSQL, XAMPP

- web-based tool which helps people renew and register for new bus passes online.
- Provide commuters with versatile pass options tailored to their travel frequency, encouraging regular usage of public transportation while simplifying payment methods.

Maharashtra Tourist Guide | HTML, CSS, PHP, JavaScript, PostgreSQL

- It is a web-based software system which allows users to discover and explore new places according to their choice.
- Users can also see photographs and information of the places and its surroundings to get conception of the places even before visiting it.
- Users can also book railway, bus and airline tickets through our software system.
- The main objective of this project is to make travel easy and comfortable for the users right from finding the best places to booking tickets.

Student Management System| HTML, CSS, PHP, JavaScript, PostgreSQL

- Designed a web-based software system for both college and student. Used by educational institutions to maintain their student's record and provide the notices.
- Multiple user roles (admin, student, etc.), and each user has different functionality.
- It includes processes like registration of the students' details, assigning all departments based on their course and management of the records.
- This system reduces the time and workforce required for this job.
- As the system is online, the information is locally present to everyone.

CERTIFICATES

- C language by IIT Bombay
- Basic Python certificate by net2net knowledge solutions (07/2021 - 09/2021)
