## Summary

PMP-certified Project Manager and MBA Finance-IT graduate and almost 5 years of experience, who enjoys building and delivering scalable digital solutions. Experienced in working across fintech, insurance, and enterprise domains, with a focus on bringing clarity to complex requirements and driving projects to completion in fast-paced environments.

## Experience

**Senior Project Manager**, 06/2025 - Current

**Enpointe.IO, Andheri West**

- Led end-to-end delivery of **cinema booking and payment systems**, managing web, app, and backend integrations
- Managed integrations with **payment gateways including Cybersource and Dibsy**, ensuring secure and seamless transaction processing
- Drove implementation of **payment workflows, wallet systems, and offer logic**, improving checkout experience and user conversion
- Coordinated cross-functional teams to deliver features across booking, F&B ordering, and in-seat service platforms
- Oversaw API integrations and system enhancements, ensuring reliability and performance across high-traffic booking environments

**Technical Project Manager**, 03/2023 - 05/2025

**WEQ Technologies, Andheri East**

- Delivered **web and mobile products** across fintech, insurance, and enterprise domains, managing end-to-end lifecycles in 3–4 month release cycles
- Led cross-functional teams to deliver solutions across **fintech, insurance, and enterprise domains**, ensuring execution against timelines and quality benchmarks
- Delivered a **SaaS platform** for general insurance and health insurance organizations
- Allowing end users to use modules related to wealth management, financial management and redeem the loyalty pointers to increase persistency.

**Project Manager**, 06/2021 - 03/2023

**Sarjak Container Liners, Andheri West**

- Led end-to-end delivery of **enterprise and financial systems**, including ERP, payment workflows, and automation solutions (RPA, OCR)
- Managed cross-functional teams to deliver multiple product initiatives, ensuring seamless execution of **transaction and operational workflows**
- Spearheaded automation using **RPA and OCR**, reducing manual processing and improving efficiency in financial and backend operations

- Collaborated with stakeholders to define requirements, manage risks, and align solutions with **business and financial objectives**
