Inquest of assignment with leading organization to utilize my professional knowledge and skill-sets & contribute towards organizational goals

POST QUALIFICATION WORK EXPERIENCE

Project execution & Document management (Electrical WTG and substation) with **Suzlon Energy Limited -** world's fifth largest wind turbine manufacturer. Currently posted at 123 MW Juniper green beam energy limited project & 300 MW Wind power project at Mandvi, Kutch [Adani Green Energy being customer]. and also posted at 70.8 MW Wind power project at Gondal [for retail customers]. The work profile consists of followings:

- Collaborated with project teams and clients to ensure seamless management of project documentation, adhering to schedules and quality standards.
- Conducted vendor and stakeholder onboarding, delivering training on ISO 9001, ISO 45001, and document control standards to ensure compliance during induction.
- Performed periodic audits of document repositories and records to ensure compliance with quality standards and managed document distribution based on project requirements.
- Provided training on document control procedures and enforced Document Management System (DMS) protocols, ensuring team adherence to documentation standards.
- Monitored document versions and metadata in real-time, tracking revisions and discrepancies to optimize document accuracy and maintain project compliance.
- Reviewed documentation for compliance with ISO 9001, ISO 45001, and project-specific standards, ensuring accurate and high-quality records.
- Oversaw document completion for project milestones, conducted internal reviews, and implemented corrective actions to meet quality and compliance requirements prior to client submission.
- Collaborated with clients and project teams to review documentation deliverables, address feedback, and ensure smooth handover of records to Operations & Maintenance (O&M) teams.
- Prepared and followed up on Non-Conformance Reports (NCRs) for documentation errors or inconsistencies, ensuring timely resolution to maintain project compliance.

During January 2022 to February 2023, worked as Quality Engineer with Fabtech Cable Pvt ltd – part of Falcon Pumps, engaged in manufacturing submersible winding wire, and all size LT cables. Work profile consisted of followings:

- Conducted quality testing of input materials and final cable products, maintaining records to ensure compliance with IS 694, IS 1554, IS 7098, and IS 8783 standards.
- Managed BIS and TUV SUD license renewals and audits, ensuring adherence to ISO 9001 quality management systems.
- Developed manufacturing schedules to align with ISO 9001 standards, optimizing production efficiency and quality control.
- Maintained and troubleshooted electrical machinery, including motors, heating equipment, and sensors, resolving critical errors in winding plant operations.
- Utilized expertise in PLC, HMI, and drive-based systems to maintain LT/HT panels and power accessories, ensuring operational reliability.

During April 2020 to December 2021, I worked as Project Engineer with **Parth Energy Solutions.** During the tenor, I was working with various CNG Gas station development projects being undertaken for Torrent Gas Limited as well as Gujarat Gas Limited. Work profile consisted of followings:

- Managed on-site materials and workforce, preparing daily work plans and material reports to meet project milestones.
- Supported installation of 100A, 400A, and 800A DG sets and main panels, including grid earthing and LT line cable sizing (240, 150, 50, 25 sq.mm).
- Ensured compliance with Schedule of Rates (SOR) standards and Single Line Diagram (SLD) drawings for CNG compressor motors, LT power panels, and transformers.
- Coordinated daily work planning to achieve timely project completion while maintaining safety and quality standards.

During November 2018 to March 2020, worked as Electrical Engineer (Operation & Maintenance) with Suzlon Energy Limited. My work profile consisted followings:

- Performed preventive and periodic maintenance of transformers, generators, and motors troubleshooting errors to ensure operational reliability.
- Maintained 11 kV and 33 kV HT lines, motors, drives, and power panel accessories, utilizing SCADA for WTG parameter monitoring.
- Analyzed power load curves, prepared Daily Generation Reports, and contributed to wind load forecasting and feeder line patrolling.
- Troubleshot DFIG converters and IGBT switch controls, minimizing downtime and optimizing WTG performance.

PRE-QUALIFICATION WORK EXPERIENCE

During July 2017 to July 2018, worked as a Service Technician with Accurate Product limited, Rajkot – a mid-size manufacturer of distribution transformers. The following is a brief of my work profile:

- Testing of manufactured transformers (Distribution transformers mainly used for CNC)
- Maintenance of transformers (rewinding, Varnishing, coil checking)
- Slotting, varnishing and making limb for transformers of their winding placed.

I have also done my internship with the same company during 01-May-2015 to 15-july2015.

EDUCATIONAL QUALIFICATION

Exam	Institution/University	Year	Result
Bachelors of Engineering (Electrical Engineering)	Gujarat Technological University	2015-2018	71.3%
Diploma (Electrical Engineering)	Gujarat Technological University	2012-2015	68.3%
S.S.C.	Gujarat Secondary Education Board	2011-2012	60.2%

PROJECT

- During diploma, prepared project on "Automatic Window control system" which was based on NTC & PTC sensor based circuits with DC Motor. USP of the project was automatic controlling of windows based on weather condition.

- During BE electrical, I was part of project for village development program under"VishwakarmaYojana Phase – V" under genesis of Gujarat Technology University. Project involved interaction with various people at village level, identifying areas of technology applications and giving solution. I had submitted 4 electrical project designs - water level control valve, CCTV cameras in school & Gram Panchayat wiring work, Solar installation estimation)

COMPUTER LITERACY

Operational knowledge of SAP, AutoCAD electrical 2D
Microsoft Office (Word, Excel, PowerPoint), Knowledge of PSCAD, ETAP software
Level 1& 2 Certification in oracle Aconex Document management software

PERSONAL INFORMATION

Date of Birth	:	8th July, 1997
Marital Status	:	Un-married
Languages Known	:	English, Hindi & Gujarati
