EDUCATION

BE (Bachelors of Engineering)
Pune University
(2016-2020)

RELEVANT SKILLS

- API Automation Testing
- IntelliJ, Maven, Eclipse
- Rest Assured, Postman, SOAP UI
- Selenium WebDriver
- BDD Cucumber
- Core JAVA, TestNG/JUnit
- Mobile Testing
- APPIUM GUI, Inspector
- Browser Stack, Real Device Testing
- Android Studio, X-code
- UI Automation
- Agile/Scrum Methodology
- JIRA/ ALM, Zephyr
- SQL,
- GIT-GITHUB, Bitbucket
- CI/CD (JENKINS)
- AWS, Azure, Docker

CAREER OBJECTIVE

A highly motivated and detail-oriented Software Test Engineer with over 4+ years of experience in automation testing, API testing, mobile testing, and test management. Proficient in Selenium, Appium, Rest Assured, Postman, and BDD frameworks, with a strong background in Java, CI/CD tools like Jenkins, and Agile methodologies. Seeking to leverage my expertise in designing, developing, and executing automated test scripts to contribute to the quality assurance and reliability of software products in a dynamic and collaborative environment.

PROFESSIONAL EXPERIENCE

Senior Software Engineer
VIRTUSA Ltd

- Designed, developed, and maintained robust **automation frameworks (Keyword, Data-driven, Hybrid)** using **Selenium, Java, TestNG, and BDD Cucumber** to support scalable test automation.
- Collaborated with developers and business analysts to **implement BDD scenarios using Cucumber**, ensuring clear traceability between requirements and automated tests.
- Performed mobile testing using Appium GUI Inspector for both Android and iOS applications on Browser Stack, ensuring cross-device compatibility.
- Automated **API testing using Rest Assured and Postman** for REST and SOAP services, validating responses and integrating with UI test flows.
- Automated testing of mobile applications using Appium with Java for functional, UI and regression Testing
- Designed and implemented API Automation suite using Rest Assured, reducing regression cycle by 50%.
- Perform schema validation and automated testing of API's
- Prepared **automation execution reports and defect metrics**, communicating status updates to stakeholders.
- Utilized **cloud-based test environments (AWS/Azure/Docker)** to run distributed tests, improving execution efficiency and scalability.
- Performed **code reviews and optimized test scripts** for reusability, maintainability, and execution performance.
- Works with clients to identify business, technical, and reporting requirements.

Test Engineer
INFOSYS Ltd, Pune

- Proficient in Test Complete & Automation Tools.
- Contributed to **process improvements, test strategy discussions, and root cause analysis** for critical defects.
- Experience in creating Test Scripting in BDD Cucumber and logging defects in JIRA.
- Conducted **automation feasibility studies** and identified test cases suitable for automation to optimize ROI.
- Analyze and documents test results and defects, collaborating with developers and project managers to ensure timely delivery of quality
- Collaborated with developers and DevOps teams to implement **Continuous Testing using Jenkins, Bitbucket, and Maven**.
