KUNAL SHARMA

NETWORK ENGINEER |INFRA IT ASSOCIATE |SOC (L1)

Delhi, India | +91 99117 69424 | kunal991176@gmail.com | linkedin.com/in/kunal9999

PROFESSIONAL SUMMARY

IT Infrastructure professional with 4.5+ years managing enterprise networks, systems, and end-user environments supporting 900–1,000+ users across multiple locations. Strong background in Active Directory administration, Microsoft 365 management, network engineering (routing, switching, LAN/WAN), firewall and VPN deployment, and endpoint security. Proven track record improving infrastructure reliability, leading backup and disaster recovery planning, and providing audit and vendor support. Cisco-certified across networking and cybersecurity fundamentals, with additional certification in IBM AI Fundamentals. Looking to bring hands-on infrastructure ownership and cross-functional IT support experience to a Senior IT Associate or Infrastructure Engineer role.

CORE COMPETENCIES

IT Infrastructure Management • Active Directory & Group Policy • Microsoft 365 Administration • Routing & Switching • LAN/WAN Support • Firewall & VPN Management • DNS & DHCP • Endpoint Security • Backup & Disaster Recovery • Network Monitoring & Troubleshooting • Vendor & Audit Coordination • CCTV & Access Control Systems

PROFESSIONAL EXPERIENCE

IT Associate — Aurionpro Solutions Ltd *Jul 2024 – Present*

- Manage enterprise IT infrastructure supporting 1,000+ users across multiple office locations, ensuring consistent uptime and reliable day-to-day operations.
- Lead Microsoft 365 administration — Exchange Online, SharePoint, Teams, and licensing — for the full user base, handling provisioning, configuration, and issue resolution.
- Administer Active Directory user lifecycle, Group Policy Objects (GPOs), and access controls to keep account management and permissions organized and secure.
- Implement and maintain VPNs, firewalls, and endpoint security tools to protect network infrastructure and reduce downtime risk.
- Manage and support backup and disaster recovery solutions, safeguarding business continuity and data integrity.
- Monitor infrastructure performance proactively, identifying and resolving issues before they impact users or operations.
- Provide technical support, coordinate with external vendors, and support internal and external IT audits.

Network Engineer — OM Tech Solutions *Feb 2022 – Jun 2024*

- Configured and maintained routers, switches, routing protocols, and switching technologies to keep enterprise networks stable and performing reliably.
- Managed CCTV and biometric access control systems end-to-end, from installation and configuration through ongoing troubleshooting.

- Supported data networking, IP addressing schemes, and subnetting across the organization's IT infrastructure.
- Monitored network performance day-to-day and resolved connectivity issues quickly to minimize disruption to operations.
